Submarines are, in effect, Australia's first line of defense.

Marines doesn t mean much in operational terms, but it s symbolic of Australia s early enlistment in a much more adversarial U.S.

In the meantime, the chief purpose of Australian grand strategy should be to defer that decision for as long as possible.

In its most controversial form, this argument contends that the enlightened self-interest of Asia s major states should be harnessed towards forming a concert of powers , an institutionalised strategic order echoing that of Europe in the nineteenth century.

Jennifer Rutledge:Australia seems to be in a rather strange and unique position.

Marines into Darwin? President Obama s visit to Australia was, I think, very significant.
